Hello! So here's the EPA request for info from Park City that I referenced in my voice mail of a few minutes ago. As mentioned, apparently there's been some indication of a reluctance to provide this info by the time we need it Will you let me know what you learn about this? Thanks, Polly.

E-mail: kmitchell@parkcity.org

Hi Ken:

Kathy Hernandez from EPA Region 8 has requested that Tetra Tech conduct a metals loading analysis of Silver Creek. In order to conduct this analysis, it is necessary to request data from Park City specific to the Judge Tunnel, Spiro Tunnel and the Prospector Square Drain. From some of our initial sampling that occurred in June of 2008, we are aware that Park City regularly monitors the flow from each of these locations. At this time, we are interested in obtaining three complete calendar years worth of flow data at the finest resolution you have available (at a minimum daily, but preferably hourly). We suggest the timeframe from January 1, 2007 through December 31, 2009. In addition to the flow data, we are also interested in all analytical chemical data (such as all available metals (Total and Dissolved if available), but at a minimum arsenic, cadmium, zinc, and lead), pH, and TSS you may have from these sources during the same timeframe. Please provide the requested data in electronic format preferably in Microsoft Excel or Access Database format, or a text file format. We would appreciate if you could please provide this information no later than Friday September 17, 2010. If you have any questions or need additional clarification, please contact Kathy Hernandez (303-312-6101) or me at 304-414-0054 X 102.

Thanks for your prompt attention to this request.

Sam
